

The logo features the word "Seed" in large, orange, 3D-style letters. A green sprout with three leaves and a white root is positioned behind the letter 'S'. Below "Seed" is the word "Sharing Library" in a bold, dark green, sans-serif font.

Seed Sharing Library

**At the Akron-Summit County Public Library
Science & Technology Division**

Growing your own healthy fruits and vegetables is one way to enhance your diet and health. Gardening is also a wonderful way to enjoy the outdoors and spend time with your family. To this end, we offer a Seed Sharing Library to help the novice explore gardening or to let the gardening aficionado try new plants or varieties in their established garden.

Our seeds are available to local gardeners, community volunteers, children, and library patrons. We offer high quality heirloom and open pollinated varieties of vegetables purchased with an eye to their value as saved seed. In addition, we offer more varieties grown and shared by local gardeners. We ask that you limit your selections to 6 packets per visit.

Stop by or call us for more information at 330-643-9075.
